- it is
- is that
- is
- being

9- We were unable to get funding andhad to abandon the project.

- therefore
- notwithstanding
- since
- providing
- however

10- You mustn't think that you can borrow it whenever you want to just I'm lending you my dress for tonight.

- due to
- yet
- in case of
- despite
- because

11- We for three years for something to happen that our situation.

- ☐ are waiting / will have improved
- ☐ were waiting / will improve
- ☐ had waited / has improved
- ☐ will have waited / will improve
- ☐ have been waiting / will improve

12- Pre to Post , is like ancient to

- ☐ antique
- ☐ old
- ☐ moderate
- ☐ past
- ☐ modern

13- The correct prefix that is used with the word “ school” is

- ☐ out
- ☐ ex
- ☐ re
- ☐ pre

14- The correct suffix that is used with the word “class” is

- ☐ ifate
- ☐ ial
- ☐ ify
- ☐ ize

15- The correct prefix that gives the opposite of the word "understanding" :

- ☐ in-
- ☐ mis-
- ☐ mal-
- ☐ un-

16- The correct suffix of the word “short” is

- ☐ -ive
- ☐ -ful
- ☐ -al
- ☐ -en

17- the correct suffix of the word “destroy” is.....

- ☐ -el
- ☐ -er
- ☐ -ful
- ☐ -en

18- The suffix of "discuss"

- ☐ - in
- ☐ - ful
- ☐ - ion
- ☐ - im

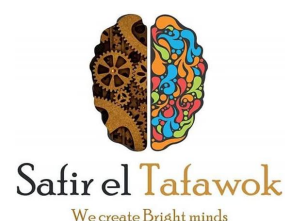

19- The correct prefix that gives the opposite of the word "dependence":

- ☐ - im
- ☐ - in
- ☐ - un
- ☐ - mis

20- Using fertilizers in agriculture has harmful effects.

- ☐ chemical
- ☐ natural
- ☐ safe
- ☐ organic

21- "Behind the scenes" means

- ☐ in public
- ☐ privately
- ☐ in a difficult position
- ☐ in a different place

22- We made a few tweaks to the original recipe. The underlined word "tweaks" means

- ☐ ingredients
- ☐ information
- ☐ adjustment
- ☐ condition

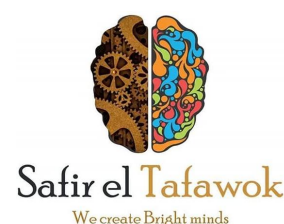

23- It might be trivial, but it was an integral part of their marriage. The antonym of the underlined word "trivial" is

- ☐ nice
- ☐ good
- ☐ basic
- ☐ easy

24- How sharp your teeth are !

- The type of this sentence is

- ☐ Interrogative
- ☐ exclamatory

Section 2: Reading Comprehension

A- Read the following passage, then choose the correct answer from a, b, or d:

1 The walnut tree produces wood that is used for countless purposes, I and is considered the finest wood in the world. The wood is easy to work with, yet it is very hard and durable and when it is polished, it produces a rich, dark shine. It also shrinks and swells less than any other wood, which makes it especially desirable for fine furniture, flooring, and even gun stocks

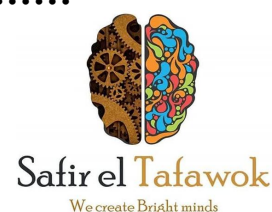

2 In fact, just about every part of the walnut is unusually hard and strong, 2 The nut of the tree is encased inside a very hard shell, which itself is enclosed in a leathery outer covering called a husk. It requires real effort to break through those layers to get at the tasty meat inside

3 Yet every part of the walnut is useful to people. The outer husk produces a dark reddish stain that is hard to remove from the hands of the person who opens the nut, and this colour is widely used in dyes and wood stains. The inner shell is used as a rough to clean jet engines. And the meat of the nut is extensively used in cooking, ice cream, flavorings and just eaten raw

4 Walnut trees give off a chemical into the soil near their roots which can be poisonous to some trees and bushes. Fruit trees, for example, will not survive if planted too close to a walnut. Many other plants, such as maple Trees or ivy, are not affected by the walnut's presence, and are well-suited to grow in its area

1.The main idea of this passage is

- walnuts can kill other frees
- trees are used for many things
- maple trees grow well with walnuts
- walnut trees are valuable when planted correctly

2.Which of the following is the correct summary for paragraph 2

- Walnuts are hard and strong, with a hard shell and leathery outer covering called husk, requiring effort to break through for the lasty meat
- Walnuts can be used in producing different types of home furniture because they are cheap and easy to be planted
- Walnuts require too much effort to grow because they need special type of soil that can protect them from harmful chemicals
- Walnuts need special tools to break through their hard and strong Layers in order to get at the tasty meat inside

3.It can be inferred that the author of the passage probably believes that

- walnut trees are endangered
- people should recycle more
- people should grow walnut trees if possible
- maple trees are not good for furniture making

4..... It is expected that after reading this passage, farmers will

- plant maple and ivy trees with walnut trees
- plant fruit trees next to walnut trees
- get rid of all the walnut trees
- stop planting walnut trees

5.Walnut trees are.....

- easily broken
- heavy-duty
- poisonous
- dangerous

6.The outer husk of the walnut produces.....

- dye
- fruits
- flavors
- chemicals

7.Comparing wood produced from walnut trees with other wood types proves that it is.....

- the worst type of wood.
- similar to any other type of wood
- the best choice for making jet engines.
- the best choice for making fine furniture

8.Every part of the walnut is.....

- tirelessly breakable
- effortlessly breakable
- deliciously eatable
- easily cookable

B- Read the following passage, then choose the correct answer from a, b, or d:

Jupiter is the largest of the giant gas planets. Had Jupiter been bigger, it might have **attained** very high temperatures. Jupiter and other giant planets are of a low-density type. **They** are composed of such substances as hydrogen, helium, ammonia and methane. Some scientists believe that the core of Jupiter might be rocky, or metallic like the core of Earth.

Jupiter rotates very fast once every 9.8 hours As a result, its clouds, which are composed of ammonia, have appeared as dark and bright bands that circle the planet at different speeds.

Jupiter sends out twice as much heat as it receives from the sun. Another star like characteristic of Jupiter is its sixteen natural satellites, which decrease in density with distance..... From Rocky moons close to Jupiter to icy moons farther away. Jupiter, with its satellites, might contain the most important clues about the origin of the solar system.

1- The clouds surrounding Jupiter are mostly composed of.....

- ☐ methane
- ☐ helium
- ☐ hydrogen
- ☐ ammonia

2-According to the passage, Jupiter's most distant moon is.....

- ☐ the largest
- ☐ the least dense
- ☐ warm on the surface
- ☐ Rocky on the surface

3-According to the passage, which of the following is NOT true about Jupiter

- ☐ The planet is of a low-density type.
- ☐ Jupiter is composed of hydrogen, helium, ammonia and methane.
- ☐ Jupiter sends out as much heat as it receives from the sun.
- ☐ scientists might learn about the solar system by studying Jupiter.

4- The correctly punctuated form for the underlined sentence "Jupiter rotates very fast once every 9.8 hours" in the second paragraph of the passage is.....

- ☐ Jupiter rotates very fast "once every 9.8 hours..
- ☐ Jupiter rotates very fast once every 9.8 hours?.
- ☐ Jupiter rotates very fast, once every 9.8 hours.
- ☐ Jupiter rotates very fast, Once every 9.8 hours

5- Jupiter might..... important clues about the origin of the solar system.

- ☐ incedul
- ☐ edulcni
- ☐ include
- ☐ Incledu

10- According to the passage, some scientists believe Jupiter and Earth are similar in that they both have.....

- ☐ methane cores.
- ☐ solid surfaces.
- ☐ similar masses.
- ☐ similar atmospheres.

Safir el Tafawok
We create Bright minds

C- Read the following passage, then choose the correct answer from a, b, or d:

1. Can you even begin to imagine what it would be like to live a life of silence in which you can't converse with others or make yourself understood? Well, today millions of people worldwide have whole conversations without actually uttering a word, due to the invention of sign language. For those people who are deaf, it is their primary means of communication with their fellow man. Unfortunately, it is mainly deaf 12 people who learn sign language, so their means of communication is limited as they can't converse with everyone.

2. Deaf people are capable of enjoying a laugh or a joke just like anyone. Usually, it is the hearing person that feels awkward or embarrassed around them. They usually raise their voice or even shout when trying to communicate – presuming this enables them to hear more – which of course is completely wrong. If hearing people just learned the basics of sign language, such as the alphabet and enough language to communicate, it would be beneficial to both groups.

3. What exactly is sign language? It is a non-verbal means of communication whereby people use gestures instead of sounds to represent words. They use their fingers to spell these words letter by letter as well as facial expressions and lip-reading. Like most of us, deaf people also use body language to convey messages to others. Sign language is not international as there are over two hundred different types of it in the world. In addition, as with most languages it has variations which differ from region to region.

1-What is author's purpose in writing this passage?

- To explain physiological problems of deaf people.
- To explain how sign language helps deaf people.
- To explain benefits of keeping silent all the time.
- To explain body language use in the oral presentation.

2-Which of the following is the correct summary for paragraph 2?

- It is advisable for normal persons to know the essentials of sign language.
- It is recommended for normal people to keep telling jokes to deaf people.
- It is common that deaf people have loud voice during conversation.
- It is difficult for deaf people to enjoy funny things like normal people.

3-What can you infer about hearing people?

- They are hesitant on how to address the deaf.
- They are unable to use sign language.
- They only know the basics of sign language.
- They are afraid of the deaf people.

4-In your opinion, what do you think hearing people should do based on paragraph 2?

- Stop dealing with deaf people.
- Fully study sign language.
- Learn sign language basics.
- Keep raising their voice.

5-What does paragraph 3 tell you about sign language?

- It has its phonic system
- It has its written format.
- It is a universal language.
- It is primarily for deaf people.

6-Which of the following is NOT one of the reasons sign language was invented for?

- Encouraging people to use gestures and lip-reading.
- Facilitating communication among deaf people.
- Helping deaf people to fit into society.
- Ensuring deaf people live a normal life.

7-Sign language has which differ from region to region.

- discrebancies
- descripances
- deskrebances
- discrepancies

8-Which one of the following sentences is correctly punctuated?

- Unfortunately its' mainly deaf people, who, learn sign language
- unfortunately, it's mainly deaf people who, learn sign language
- Unfortunately, it's mainly deaf people who learn sign language.
- Unfortunately, its mainly deaf people who, learn sign language

Homework

1-the prefix “un” in the word “unfit” means

Section 2: Reading Comprehension

A- Read the following passage, then choose the correct answer from a, b, or d:

Televisions show sounds and pictures. They get data from cables, discs, or over-the-air signals. They turn this data into sounds and images. People watch news and shows on them. You probably call them TVs.

John Baird made the first TV in 1925. It had one color. It could only show 30 lines. This was just enough room for a face. It didn't work well, but it was a start.

The first TV station was set up in 1928. It was in New York. Few people had TVs. The broadcasts were not meant to be watched. They showed a Felix the Cat doll for two hours a day. The doll spun around on a record player. They were experimenting. It took many years to get it right.

By the end of the 1930s, TVs were working well. America got its first taste at the 1939 World's Fair. This was one of the biggest events ever. There were 200 small, black and white TVs set up around the fair. The U.S. President gave a speech over the TVs. The TVs were only five inches big but the people loved it. They wanted TVs. But World War II was going on during this time. Factories were busy making guns and bombs. When the war was over, TV spread across the country.

By 1948 there were 4 big TV networks in America. They aired their shows from 8 to 11 each night. Local shows were aired at other times. Most of the time, nothing was shown at all. TV was not "always on" like it is now.

Color TVs came out in 1953. They cost too much money for most. Also, shows were aired in black and white. By 1965, color TVs were cheaper. TV stations started airing shows in color. People had to switch if they wanted to see the shows.

Now most TVs are high-def. This means that they have many lines on them. This makes the image clear. TVs have come a long way since Baird's 30 line set. High-def TVs have 1080 lines. There are state of the art sets called 4K TVs. These TVs have 3,840 lines. Some people watch TV in 3D. I wonder what they will come up with next. Smell-o-vision anyone?

1- When did color TVs come out?

- ☐ 1925
- ☐ 1953
- ☐ 1939
- ☐ 1965

2- Which was not true about the first TV?

- ☐ It could only show one color.
- ☐ It only had 30 lines.
- ☐ It did not have sound.
- ☐ It did not work well.

Safir el Tafawok
We create Bright minds

3- When did networks start showing programs in color?

- 1948
- 1953
- 1965
- 1939

Safir el Tafawok
We create Bright minds

4- Why did the first TV station only show Felix the Cat for two hours a day?

- They were running tests.
- Felix the Cat was really popular.
- Felix the Cat had been a big radio star.
- Felix the Cat was the only show that they had.

5- Which of these events slowed the spread of TVs?

- The World's Fair of 1939
- The Civil War
- The election of the U.S. President.
- World War II

Safir el Tafawok
We create Bright minds

6- What is the author's main purpose in writing this?

- He is trying to explain how a TV works.
- He is telling readers how TVs became popular.
- He is describing the history of the TV.
- He is trying to get people to watch more TV.

7- Why did many families switch to color TVs in 1965?

- Color TVs cost a lot of money.
- Many shows were only shown in color.
- Color TVs came out in 1965.
- World War II ended and troops returned home.

8- Why was 1939 an important year for TV?

- Many Americans were introduced to TV.
- The first color TV was released.
- The first TV station began broadcasting.
- John Baird created the first TV.

Safir el Tafawok
We create Bright minds

9- How many lines does a 4K TV have?

- 30
- 1,080
- 4,000
- 3,840

10- Which happened first?

- The 1939 World's Fair
- The release of high-def TVs
- The end of World War II
- The release of color TVs

B- Read the following passage, then choose the correct answer from a, b, or d:

The Coliseum is an ancient stadium in the center of Rome. It is the largest of its kind. It is very old. They started building it in the year 70. It took ten years to build. It is still around today.

The Coliseum has been used in many ways. In ancient Rome, men fought each other in it. They fought against lions, tigers, and bears. Oh my! It was dreadful. But most of the people loved it. As many as 80,000 Romans would pack inside to watch. These gruesome events went on until 523.

The Coliseum has been damaged many times over the years. It was struck by lightning in the year 217. This started a fire. Much of the Coliseum is made of stone. But the fire damaged the upper levels. They were made of wood. This damage took many years to repair. It was not finished until the year 240.

The worst damage happened in 1349. A mighty earthquake shook Rome and the Coliseum. The south side of the building collapsed. Pieces of the arena were all over the ground. Many people took the fallen stones. Others took stones from the seating areas. They used them to repair houses and churches.

A sketch of the Coliseum The Romans of those days were not connected to the Coliseum. It had last been used as a castle. Before that it was a graveyard. It has been hundreds of years since the games. The damage to the Coliseum was never repaired. It's a good thing the outer wall of it still stands strong.

Today the Coliseum is one of Rome's most popular attractions. People from all over the world come to Italy to see it. The Pope leads a big march around it every Good Friday. It is a symbol that many know. It has even appeared on the back of a coin. I guess that makes it a symbol that many people want too.

1- Which happened first?

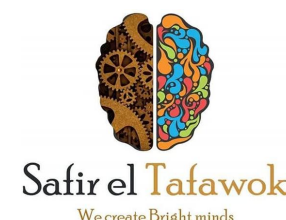

- An earthquake damaged the Coliseum.
- The Coliseum was struck by lightning.
- The Coliseum appeared on the back of a coin.
- The Coliseum was used as a castle.

2- When did the Romans finish building the Coliseum?

- The year 70
- The year 523
- The year 80
- The year 240

3. What caused the fire that damaged the upper levels of the Coliseum?

- A bolt of lightning
- Rowdy people who came to watch the events
- An attacking army
- An angry mob

4- For which purpose was the Coliseum not used?

- People fought other people in it.
- It was a private castle.
- People fought animals in it.
- It was a meeting place for the government.

5- Which caused the most damage to the Coliseum?

- Fires
- Earthquakes
- Wars
- Hurricanes

6- What did the people do with the stones that they took from the Coliseum?

- They repaired buildings.
- They sold them.
- They used them as weapons.
- They used them as tombstones. A

7- Which best defines the word gruesome as it is used in the second paragraph?

- Exciting
- Funny
- Horrifying
- Boring

8- Which best describes the main idea in the last paragraph?

- This is about all the things the Coliseum has been used for throughout history.
- This is about how the Coliseum is a popular place to visit today.
- This is about how the Coliseum is a symbol that many people know.
- This is about how the Coliseum is used today.

9- Which was not a way in which the Coliseum was damaged over the years?

- Earthquake
- Tornado
- Lightning
- Fire

10- Which statement would the author most likely agree with?

- The Coliseum should be replaced with a building that is not damaged.
- The Coliseum has its place in history but it is not useful today.
- The Coliseum should be used for fighting once again.
- The Coliseum is very old and has been used for many purposes.

C- Read the following passage, then choose the correct answer from a, b, or d:

In this age of texts and tweets, it is easy to send messages. You just press a few buttons, and boom! Your message is sent. The person to whom you sent it will get it in just a few seconds. Distance is no longer an issue. But things weren't always so easy.

In 1848 gold was found in California. Thousands of people rushed there to get some. Many people liked living there and decided to stay. But there wasn't a whole lot between California and Missouri, where the nearest trains ran. The train line to California wasn't finished until 1869. It took a long time to ride a horse to Missouri.

Imagine that it is the year 1860. You have moved to California to open a shop. Most of your family stayed back East. Your shop is doing well and now you want to your family to join you. How do you get news to them? There's no phone, no train, and you can't leave your shop for too long. What do you do? Well, you could use the Pony Express.

In 1860 and 1861, the Pony Express was the fastest way to get news to and from the West. The trail that they rode was around 2000 miles long. It took most people weeks or months to ride that far. The Pony Express could make the trip in just ten days. Those speeds were unheard of at the time. So how did they do it? Well, they had a good system.

The Pony Express had 184 stations along the trail. The stations were around ten miles apart. This is about how far a horse could run at a gallop before tiring. The rider would switch to a new horse at each station. He would only take his mail pouch with him. Every 75-100 miles, the rider would get to a home station. At each home station, riders would rest. Before resting, he would give his mail pouch to a new rider. The mail never stopped moving, even while the horses and riders rested.

It was tough to ride for the Pony Express. Each rider had to weigh less than 125 pounds. Speed was the key. Most of the riders were teenage boys. They rode at a fast pace for up to 100 miles a day. If there were an emergency, one might have to ride 200 miles in a day. The ride could be rough and dangerous. Attacks by Native Americans were common. But in its time running, the Pony Express only lost one mail pouch.

The Pony Express filled an important role for a time, but it did not last. The Civil War started in April of 1861. This was bad news for the owners. The worst for them was yet to come. On October 24th, 1861, the first telegraph line to California was finished. This linked them to the rest of the country. People could send messages in an instant. Two days later the Pony Express closed. But the lore of the brave riders lives on even today.

1- Which happened first?

- Settlers rushed to California to find gold.
- The Pony Express was started.
- The train line to California was finished.
- The first telegraph line to California was finished.

2- Which best explains why Pony Express riders had to weigh less than 125 pounds?

- Heavier men were more expensive.
- Horses were scared of heavier men.
- Heavier men scared customers.
- Horses could move quicker with lighter men.

3- How fast could the Pony Express take a letter from California to Missouri?

- 24 hours
- ten days
- twenty days
- one month

4- Why were the Pony Express stations about ten miles apart?

- This was about as far as a man could walk in a single day.
- This was as far as a man could ride on a horse in a day.
- This was so the riders wouldn't get so lonely at night.
- This was as far as a horse could run without getting tired.

5- Which was probably not a requirement to be a rider for the Pony Express?

- You had to be light.
- You had to be an expert horse rider.
- You had to be able to read and write.
- You had to be brave in the face of danger.

6- Which best describes that main idea of the fifth paragraph?

- It is about how many Pony Express stations there were.
- It is about how the Pony Express carried mail so quickly.
- It is about how the Pony Express riders slept in the stations.
- It is about how far the Pony Express riders would go in a day.

7- Which of these ended the Pony Express?

- The telegraph
- The Civil War
- Wars with Native Americans
- The train line

8- About how far did Pony Express riders travel on a usual day?

- 10 miles
- 200 miles
- 100 miles
- 2000 miles

9- How many mail pouches did the Pony Express lose?

- The Pony Express never lost a mail pouch.
- One
- Two
- Too many to keep track

10- Which title best describes the author's purpose in writing this?

- Out of Touch: Why Phones are Faster Than Horses
- The Pony Express: Stories of Their Bravery in Battle
- Back in Touch: Why We Should Use Horses to Deliver the Mail
- The Pony Express: About the 1860's Fastest Mail Service

D- Read the following passage, then choose the correct answer from a, b, or d:

Have you ever been to the beach? Did you see a man with a headset pointing a long pole at the ground? If so you might have seen a person using a metal detector. People use these devices to find metal.

Metal detectors make magnetic waves. These waves go through the ground. The waves change when they hit metal. Then the device beeps. This lets the person with the device know that metal is close.

The first metal detectors were meant to help miners. They were big. They cost a lot of money. They used a lot of power. And worst of all, they didn't work well. People kept trying to make them better.

Metal detectors got smaller. Now they are light and cheap. They also work better. That is why people bring them to the beach. They can look for rings in the water. They can look for phones in the sand. Metal detectors help them find these things. They usually just find junk though.

Metal detectors also protect people. They help to keep guns out of some places. They are in airports. They are in courthouses. Some schools use them. They help guards look for weapons. Guards use special wands to find metal on a person.

These devices save lives in other ways too. During wars, people plant bombs in the ground. When the war ends, they don't clean up their messes. This is unsafe for the people who live in those places. Others use metal detectors to find bombs. They remove them and help the people.

These devices also make clothes safer. It sounds funny, but it's true. Most clothes are made in big factories. There are lots of needles in these places. Needles break from time to time. They get stuck in the clothes. They would poke people trying them on. They don't though. That's because our clothes are scanned for metal. Isn't that nice? Let's hear it for metal detectors. They make the world a safer place.

1- Which was not one of the problems with the first metal detectors?

- They were too big.
- They were too expensive.
- They didn't work well.
- They were unsafe.

2- Which best describes the main idea of the second paragraph?

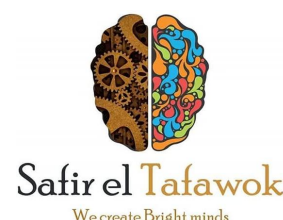

- It describes the sounds of a metal detector.
- It explains how metal detectors work.
- It warns about the effects of metal detectors.
- It explains how magnetic waves move.

3- How do metal detectors make clothing safer?

- Metal detectors make sure factory machines are working the right way.
- Metal detectors make sure workers don't bring weapons into factories.
- Metal detectors make sure that broken needles don't get into clothing.
- Metal detectors help people recover lost clothing at the beach.

4- Why were metal detectors first used?

- To help miners
- To help security guards
- To help doctors
- To help soldiers

5- According to the text, metal detectors have been used in all of the following except which?

- schools
- churches
- courthouses
- airports

6- How do metal detectors help soldiers?

- They warn soldiers when bullets are coming.
- They help soldiers find hidden bombs.
- They find weaknesses in their armor.
- They create a relaxing beeping noise.

7- Why do people bring metal detectors to the beach?

- Metal detectors help people keep the sand clean and safe.
- Metal detectors look cool.
- Metal detectors help people find valuable items.
- Metal detectors help guards keep weapons away from the beach.

8- Which happens first?

- The metal detector beeps alarmingly.
- The magnetic waves hit metal and change.
- The magnetic waves go through the ground.
- The metal detector creates magnetic waves.

Safir el Tafawok
We create Bright minds

9- How did metal detectors get better over time?

- They became cheaper.
- They became lighter.
- They began working better
- All of these

10- Which title would best describe the purpose of this text?

- A Day at the Beach: Using Your Metal Detector to Find Things
- Metal Detectors: a Complete the Story of Their Invention
- Magnetism and More: How a Metal Detector Works
- Metal Detectors: What They Do and How We Use Them

E- Read the following passage, then choose the correct answer from a, b, or d:

The modern age is an age of electricity. People are so used to electric lights, radio, televisions and telephones that it's hard to imagine what life would be like without them.

When there is a power failure, people use candles. cars hesitate in the streets because there are no traffic lights to guide them, and food spoils in silent refrigerators. scientists are discovering more and more that the Living word it may hold many interesting secrets of electricity that could "benefit" humanity.

All living cells sent out tiny pulses of electricity as the heart beats, it sends out pulses of recorded electricity; which a doctor can study to determine how well the heart is working. the brain, too, sends out brain waves of electricity, which can be recorded. but in some animals, certain muscle cells are electrical generators.

The electric eel can send a jolt of as much as eight hundred volts of electricity through the water in which it lives. four fifths of all the cells in the electric eel's body are specialized for generating electricity, and strength of electric shock it can give is greatly related to the length of its body.

1- What does the passage say about the human brain?

- it sends out waves of electricity
- it can be found in some animals
- it spoils the human heart
- it sends out waves for eels in the water

2- Why does the message mention electric eels?

- to warn the reader to stay away from them
- to compare their shapes to that of other animals
- to give example of an animal that generates electricity
- to describe a different source of power

3- It can be inferred from the passage that the longer an eel is the _____

- more beneficial it will be to science.
- more powerful will be its electrical charge.
- easier it will be to find.
- tougher it will be to eat.

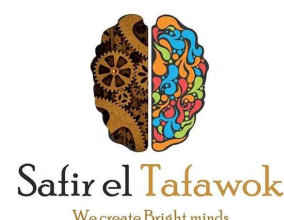

4- The electricity was invited.....

- when men have no candles
- about 200 years ago
- to be operating computers
- by Thomas Edison

5- The following things can send out pulses of electricity expect.....

- electric eels and the human hearts
- electrical generators and animal muscle
- stones and dry wood
- human brain and living cells

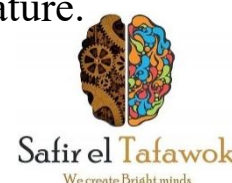

6- The electric current send out by an eel can be.....

- as much as 800 volts
- about one hundred and twenty volts
- as high as the house current in China
- stored in the water it lives

7- From this shot passage we can infer ____.

- the shorter an eel is, the stronger electricity it produces.
- we can always feel the electricity produced by living cells.
- human beings get their knowledge about electricity from nature.
- people learn about electricity from eels.

8- What is the primarily concerned of the passage?

- Electric eels are potentially dangerous.
- Biology and electricity appear to be closely related.
- People would be at a loss without electricity.
- Scientists still have much to discover about electricity

9- The author mentions all of the followings as results of a blackout EXCEPT

- Refrigerated food items may go bad.
- Difficulty in positioning
- Traffic lights do not work.
- Elevators and escalators do not function.

10- The underlined word " benefit" has the same meaning of.....

- harm
- help
- pay
- ruin

11- Which one of the following sentences can summarize the passage....

- electricity is very important to the Living World
- Doctor study how the human heart works
- the electric eel lives in the water
- traffic lights guide cars in the Streets

12- Based on the passage , what is true about all living cells?

- they use candles all night
- they study how the heart works
- they spoil food in refrigerators
- they sent out tiny pulses of electricity
