Section 2: Reading Comprehension

A1- Read the following passage, then choose the correct answer from a, b, or d:

The industry of steel wires has thousands of uses. For example, steel wire is used for fences, paper clips, coat hangers, safety pins, needles etc. It is made by pulling steel rods through smaller and smaller holes. The steel rods are made into wire when they are cold. They are pulled through a hole in a hollow container and to which soft or liquid substances are poured. There is a coating of lime on the rods. This coating of lime keeps them from sticking to the hollow container.

The cold steel rod is wound round a spool. One end of the rod is pointed. This pointed end is put through the hole of the hollow container. It is then fixed to another container which an electric motor turns and the steel rod is pulled through the hole of the hollow container.

The rod is pulled through the hollow containers several times. Each time, it is pulled through a smaller hole and becomes longer and narrower. Finally, it becomes steel wire.

Some of these steel wires are used to connect between two electric containers where an electric current can flow through. For example, a fuse is a small piece of wire. Yet, when the fuse wire is broken, the electric current will not be able to flow into it. Other steel wires are used to join two pieces of wood together and stop both from separating. For example, nails which are thin pointed pieces of metal with a flat end to be hit and driven into the best places of wood with a hammer.

1- Although we use to connect the electric current, it is a reason for cut it off.

- fuss
- nail
- hollow container
- coating of line

2- According to the passage, if you want to be a steel technician, you should

- use the steel rods and wires everywhere
- use the iron and steel remains of other factories
- study the science and technology of metals
- try not to buy or sell the steel wires

3- According to the passage, it's predicted that the reader may

- prepare a workshop for making and selling steel wires.
- do researches about how to keep the fuse unbroken.
- work in favour of another factory of steel wires.
- collect information about the industry of iron and steel.

4- According to the passage, the writer should have to tell the reader about

- how hot the places of making steel wire are
- how cold the places of making steel wire are
- the unavailable medical aids in steel factories
- the negligence of buying the steel products

5- According to the passage, which of the following statements express about the usage of steel wires?

- using them for constructing a whole house
- using some of them for constructing part of a house
- not using them absolutely for constructing houses
- houses can't be constructed by using them

6- The main idea of the passage is

- the containers of steel wires
- the containers of steel rods
- making and using steel wires
- pulling and fixing steel rods

7- Which of the following can summarize the passage?

- the benefits of steel wire are various
- several steps for getting an electric current
- fuses and nails help us more
- the benefits of steel wire are various

8- we can infer from the passage that

- the industry of steel wire is easy
- the industry of steel wire is useless
- products of steel wire are difficult to use
- products of steel wire are helpful everywhere

B2- Read the following passage, then choose the correct answer from a, b, or d:

Considering that there are life forms on Earth that have adapted to live on so many different environments, from air to the bottom of the ocean, it's hard to believe that there wouldn't be a variety of life forms on a planet where temperatures are at least reasonable. Some of the creatures that have been found are in some of the most inhospitable places on this Earth. They could be found elsewhere. Furthermore, life forms could exist on Kepler-452b which is the most earth-like planet yet. It was discovered by astronomers using NASA's Kepler Space Telescope, It's most likely five times that on Earth

Safir el Tafawok
We create Bright minds

Most interesting, it might be small and cool enough to host liquid water on its surface – and might therefore be hospitable to life. Another most fascinating aspect of it is that while similar in size and brightness to the sun its host star is 1.5 billion years older than ours. Scientists, therefore, believe it could point to a possible future for the Earth. The increasing energy from its aging sun might be heating the surface and evaporating any oceans. The water vapor would be lost from the planet forever. Thus, it could be experiencing now what the Earth will undergo more than a billion years from now

But scientifically, as yet, no conclusive evidence supported or confirmed the theory of the existence of life on another planet or in other galaxies; though what it was said that there have been examples where people claimed that they met aliens or actually saw UFOs.

1- The main idea of the passage is

- earth has so many other followers
- life on Earth now and then
- galaxies are the twin of Earth
- other planets are hospitable to life

2- Which of the following statements can summarize the passage?

- life forms exist on other planets
- life on Earth and other places
- energy coming out of the sun
- water on earth is always evaporated

3- According to the passage, it's inferred that

- future of life on Earth causes people to discuss it
- end of life on Earth causes people to discuss it
- there is an opportunity for life on water
- there is no newly discovered Earth-like planet

4- According to the passage, you predict that

- the future life on earth leads to make many researches
- people can live on Kepler-452b at a time in the future
- people can leave the discussion about life forms on Earth
- someday, life forms on Earth or Kepler-452b are possible

5- According to the passage, the writer didn't mention

- the similarity of size and brightness between Kepler-452b and the sun
- the similarity of environments from air to the ocean bottom
- how to prevent water from evaporating for life on Earth
- using NASA's Kepler Space Telescope for discovering Kepler-452b planet

6- According to the passage, we face the danger of

- life on another planet
- the sun disappear
- evaporation of water
- exist of Kepler-452b planet

Safir el Tafawok
We create Bright minds

7- Differences and the similarities mentioned in the passage are supported by

- number of the life years
- number of Kepler's planets
- temperatures of the creatures and planets
- the sun heat and water vapor

8- After reading the passage, it can be concluded that

- the writer should have reviewed his numbers
- reviewing the passage repeatedly might have supported its end
- the writer should have discussed the claims of people
- the word claimed in the last paragraph destroyed the passage aim

C3- Read the following passage, then choose the correct answer from a, b, or d:

1 Saving energy means saving money. Homeowners and renters know this basic fact, but they often don't know what kinds of adjustments they can make their homes and apartments that will result in savings.

2 For those willing to spend some time and money to gain long term energy savings, an energy audit is the way to go. An energy auditor will come into your home and assess its energy efficiency. The auditor will pinpoint areas of your home that use the most energy and offer solutions to lower your energy use and costs. Trained energy auditors know what to look for and can locate a variety of faults that may be resulting in energy inefficiency, including inadequate insulation, construction faults, and irregular heat distribution.

3 There are quicker and less costly measures that can be taken as well. One way to save money is to replace incandescent lights with fluorescents. This can result in a savings of more than 50% on your monthly lighting costs.

4 When it's time to replace old appliances, it's wise to spend a bit more for an energy-efficient model, and be sure that you are taking advantage of energy-saving settings already on your current refrigerator, dishwasher, washing machine, or dryer.

5 Windows provide another opportunity to cut your energy costs. Caulk old windows that might be leaky to prevent drafts, and choose double-paned windows if you're building an addition or replacing old windows.

6 Most areas of your home or apartment offer opportunities to save energy and money. The results are significant and are well worth the effort.

1- The main idea of the passage is

- There are many things a homeowner or renter can do to save energy and money.
- Hiring an energy auditor will save energy and money
- Homeowners and renters don't know what they can do to save energy and money
- Replacing windows and light bulbs are well worth the effort and cost

2- Which of the following is the correct summary for the paragraph 4?

- An energy-efficient model of refrigerators, dishwashers, washing machines, or dryers can save your money and efforts.
- It is well-known that refrigerators, dishwashers, washing machines, or dryers needs high electric power supply.
- Replace old appliances with energy-efficient models and utilize energy-saving settings in current appliances.
- Old appliances should be replaced with new expensive ones if you have enough money and space.

3- According to the passage, it can be inferred that double-paned windows

- should only be used in new additions to homes
- should only be used as replacement windows
- will raise your heating costs by 50%
- are energy efficient

Safir el Tafawok
We create Bright minds

4- It is expected that people will save money and energy if they

- request an auditor to check their appliance warranty
- substitute incandescent lights with fluorescents lights
- substitute fluorescents lights with incandescent lights
- rent their home to trained energy auditors

5- Which of the following ideas is NOT included in this passage?

- Double-paned windows can cut energy costs
- Some appliances have energy-saving settings
- Fluorescent bulbs can reduce your monthly lighting costs
- Your local energy company will send you auditors to fix all of your problems

6- According to the passage, which of the following would an energy auditor NOT do?

- Check for construction errors
- Locate energy errors and fix them
- Look for problems with heat distribution
- Offer solutions to lower your energy costs

7- According to the passage, how are incandescent lights and fluorescents lights alike?

- Both of them run on electricity
- They are both used to cut energy costs
- Both of them should be replaced monthly
- They are both expensive energy measures

8- Based on what mentioned in the passage, appliances can be responsible for

- a lot of the energy consumption in people's home
- more than 50% of people monthly lighting costs
- inadequate insulation and construction faults
- A lot money for annual maintenance
